

# Red squirrel surveys

## Ecological Techniques:

- Cone transects
- Mark-release;recapture
- Hair tubes
- Cameras
- Drey counts

## Ecological Theory:

- Interspecific and Intraspecific competition
- Population fluctuations
- Alien species introduction

## Ecological Analysis:

- Population estimates from energy demands
- Mark – recapture population estimations

## Enhancement:

- Critical appraisal of ecological monitoring techniques
- Conservation of protected species
- Role of conservation organisations
