

# Woodland day

## Ecological Techniques:

Random sampling  
Frame and point quadrats  
abiotic sampling

## Ecological Theory:

Distribution of organisms  
Effect of abiotic factors  
(coniferous vs deciduous)  
Management of habitat

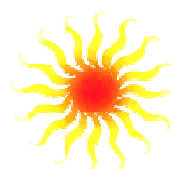

## Ecological Analysis:

Diversity indices  
for habitat comparison  
Causal relationships

## Enhancement:

Other species present  
Woodland management  
Role of conservation organisations  
Protected status of habitat
